

TECHNICAL MANUAL
NO. 5-852-6
AIR FORCE REGULATION
AFR 88-19, VOLUME 6

HEADQUARTERS
DEPARTMENTS OF THE ARMY
AND THE AIR FORCE
WASHINGTON, DC, 25 January 1988

ARCTIC AND SUBARCTIC CONSTRUCTION—CALCULATION METHODS FOR DETERMINATION OF DEPTHS OF FREEZE AND THAW IN SOILS

		Paragraph	Page
CHAPTER 1.	GENERAL		
Purpose and scope		1-1	1-1
References and symbols		1-2	1-1
Background		1-3	1-1
CHAPTER 2.	DEFINITIONS AND THERMAL PROPERTIES		
Definitions		2-1	2-1
Thermal properties of soils and other construction materials		2-2	2-2
Fundamental considerations		2-3	2-3
Freezing and thawing indexes		2-4	2-5
CHAPTER 3.	ONE-DIMENSIONAL LINEAR AND PERIODIC HEAT FLOW		
Thermal regime		3-1	3-1
Modified Berggren equation		3-2	3-1
Homogeneous soils		3-3	3-3
Multilayer soils		3-4	3-3
Effect of snow and vegetative cover		3-5	3-6
Surface temperature variations		3-6	3-6
Converting indexes into equivalent sine waves of temperature		3-7	3-8
Penetration of freeze or thaw beneath buildings		3-8	3-11
Use of thermal insulating materials		3-9	3-18
CHAPTER 4.	TWO-DIMENSIONAL RADIAL HEAT FLOW		
General		4-1	4-1
Pile installation in permafrost		4-2	4-2
Utility distribution systems in frozen ground		4-3	4-7
Discussion of multi- dimensional heat flow		4-4	4-13
APPENDIX A.	LIST OF SYMBOLS		A-1
APPENDIX B.	THERMAL MODELS FOR COMPUTING FREEZE AND THAW DEPTHS		B-1
APPENDIX C.	REFERENCES		C-1
	BIBLIOGRAPHY		BIBLIO-1

*This manual supercedes TM 5-852-6/AFM 88-19, Chap. 6, dated January 1966.

LIST OF FIGURES

Figure	2-1. Average thermal conductivity for sands and gravels, frozen.....	2-3
	2-2. Average thermal conductivity for sands and gravels, unfrozen.....	2-4
	2-3. Average thermal conductivity for silt and clay soils, frozen.....	2-4
	2-4. Average thermal conductivity for silt and clay soils, unfrozen.....	2-4
	2-5. Average thermal conductivity for peat, frozen.....	2-5
	2-6. Average thermal conductivity for peat, unfrozen.....	2-5
	2-7. Average volumetric heat capacity for soils.....	2-8
	2-8. Volumetric latent heat for soils.....	2-9
	2-9. Average monthly temperatures versus time at Fairbanks, Alaska.....	2-10
	2-10. Relationship between wind speed and n-factor during thawing season.....	2-11
	2-11. Relationship between mean freezing index and maximum freezing index for 10 years of record, 1953-1962 (arctic and subarctic regions).....	2-12
	2-12. Relationship between mean thawing index and maximum thawing index for 10 years of record, 1953-1962 (arctic and subarctic regions).....	2-13
	3-1. λ coefficient in modified Berggren formula.....	3-2
	3-2. Relationship between $(x/2\sqrt{at})$ and $\text{erf}(x/2\sqrt{at})$	3-7
	3-3. Sinusoidal temperature pattern.....	3-9
	3-4. Indexes and equivalent sinusoidal temperature.....	3-10
	3-5. Average monthly temperatures for 1949-1950 and equivalent sine wave, Fairbanks, Alaska.....	3-11
	3-6. Long-term mean monthly temperatures and equivalent sine wave, Fairbanks, Alaska.....	3-12
	3-7. Schematic of ducted foundation.....	3-14
	3-8. Properties of dry air at atmospheric pressure.....	3-16
	4-1. Illustration for example in paragraph 4-1a.....	4-2
	4-2. Temperature around a cylinder having received a step change in temperature.....	4-3
	4-3. General solution of slurry freeze-back.....	4-4
	4-4. Specific solution of slurry freeze-back.....	4-5
	4-5. Freezeup of stationary water in an uninsulated pipe.....	4-9
	4-6. Temperature drop of flowing water in a pipeline.....	4-12

LIST OF TABLES

Table	2-1. Specific heat values of various materials.....	2-2
	2-2. Thermal properties of construction materials.....	2-6
	2-3. Calculation of cumulative degree-days.....	2-9
	2-4. n-factors for freeze and thaw.....	2-11
	3-1. Multilayer solution of modified Berggren equation.....	3-5
	3-2. Thaw penetration beneath a slab-on-grade building constructed on permafrost.....	3-13
	3-3. Insulated pavement design, no frost penetration.....	3-20
	3-4. Insulated pavement design, frost penetration.....	3-20
	B-1. Thermal, fluid and electric analogs.....	B-2
